DETAILED ACTION

1. Claims 5-9 are pending in the instant application.

Claim Objections

2. Claims 5-9 are objected to because of the following informalities:

Regarding claim 5, in line 4, "the $N=2^M$ N-chip Walsh codes" is lacking antecedent basis, in line 11, "the N N-sample discrete real Fourier transform codes" is lacking antecedent basis, in line 22, "the real and imaginary axis component codes" is lacking antecedent basis, in lines 22-23, "said hybrid Walsh codes" is lacking antecedent basis, and, in line 24, "real Walsh codes" is lacking antecedent basis.

Regarding claim 6, in line 3, "said Hadamard", "said Walsh", "said DFT", and "said pseudo-noise PN" are each lacking antecedent basis.

Appropriate correction is required.

3. Claims 7-9 are objected to under 37 CFR § 1.75(c) as being in improper form because a multiple dependent claim may not depend upon more than one independent or dependent claim. See MPEP § 608.01(n). Accordingly, the claims have not been further treated on the merits.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. § 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 5-9 are rejected under 35 U.S.C. § 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Art Unit: 2611

Regarding claim 5, the claim is indefinite because of the lack of antecedent basis in the claim as applied above.

Regarding claim 6, the claim is indefinite because one skilled in the art is unable to determine how the various operations (i.e. tensor product, direct product, and functional combining) are utilized to create the generalized hybrid Walsh codes. That is, one is unable to determine which operations are utilized and which are not utilized.

Regarding claims 7-9, the claims are rejected as being based upon rejected parent claims.

6. Claims 5-9 are rejected as failing to define the invention in the manner required by 35 U.S.C. 112, second paragraph.

The claim(s) are narrative in form and replete with indefinite and functional or operational language. The structure which goes to make up the device must be clearly and positively specified. The structure must be organized and correlated in such a manner as to present a complete operative device. The claim(s) must be in one sentence form only. Note the format of the claims in the patent(s) cited.
